Executive Summary

Detail-oriented Software Engineer specializing in building **scalable enterprise platforms** and high-performance backend systems aligned with **business needs**. Expert in **PHP (Laravel)**, with a deep understanding of **System Design**, **MVC architecture**, and **Object-Oriented Programming (OOP)**. Experienced in designing **RESTful APIs**, managing complex **MySQL** databases, and implementing **real-time integrations** and **payment gateways**. Skilled in developing robust **Automation Testing** suites and advanced **Web Scraping** solutions using **(Laravel & Python)**. Beyond technical execution, I am a **collaborative communicator** skilled at building positive professional relationships across all organizational levels. A **critical thinker** and **lifelong learner**, I am committed to continuously upgrading my technical knowledge for applied use in optimizing system performance and delivering robust, secure architectures within **Git-based** workflows.

Professional Experience

Freelance Software Engineer | Remote

Feb. 2024 – Mar. 2024 | Cairo, Egypt

- Architected and deployed a real-time **Web Scraping API** using **Laravel** to extract dynamic **job market data** from **Wuzzuf** for a **Flutter-based mobile application**.
- Engineered a **custom pagination engine** that synchronized frontend requests with **scraped data**, allowing for **high-performance data delivery** across multiple **page offsets**.
- Implemented intelligent **error handling** and **validation logic** to provide clear system feedback (e.g., total job counts and available page ranges) when requests exceeded available **data limits**.
- Designed a flexible **data persistence layer** supporting **JSON file exports**, and seamless integration with **MySQL** databases for **long-term storage**.

Backend Developer Trainee | EraaSoft – PHP & Laravel Diploma

Jun. 2023 – Oct. 2023 | Cairo, Egypt

Projects

MarketPulse Real-Time Data Engine | Graduation Project

Jan. 2024 – Jun. 2024

- Developed an automated **data scraping pipeline** using **Goutte** and **Laravel Task Scheduling** to periodically collect and update live prices for gold, cryptocurrencies, silver, and currencies.
- Architected a custom **ETL pipeline** utilizing **Laravel** and **Carbon** to ingest, **normalize**, and standardize multiple multi-year datasets, ensuring **data integrity** for high-accuracy **AI predictive training**.
- Architected a **RESTful API** using **MVC pattern** to provide high-speed data delivery to a **Flutter** frontend, implementing **Laravel Sanctum** for secure, **token-based authentication**.

Clinic Booking System | Professional Training Project

Jun. 2023 – Oct. 2023

- Developed a full-stack **Healthcare Platform** featuring a patient-facing interface and an **AdminLTE dashboard**, with a unified **RESTful API** for seamless **Web** and **Mobile synchronization**.
- Engineered a secure **booking engine** using **RBAC (Role-Based Access Control)** for **data isolation** and an automated **notification system** triggered by **Laravel Events** via **Mailtrap**.

Technical Skills

Backend & Databases

- PHP, Laravel, MVC Architecture
- SQL (MySQL), Database Design & Normalization
- RESTful APIs & Secure Authentication (Sanctum)
- Eloquent ORM & Time-Series Data (Carbon)
- Role-Based Access Control (RBAC)
- Payment Gateway Integrations & Middleware

Computer Science Foundations

- Object-Oriented Programming (OOP)
- Data Structures & Algorithms (DSA), Problem Solving
- C, C++, Java, Python (Scripting & Automation)
- System Design & Software Development Life Cycle (SDLC)

Frontend Development

- JavaScript (ES6+), TypeScript, AJAX, Blade Engine
- HTML5, CSS3, Bootstrap, Tailwind CSS
- Responsive Web Design, DOM Manipulation

Automation & Real-time

- Web Scraping Goutte (PHP), BeautifulSoup (Python)
- Task Scheduling & Cron Jobs
- Real-Time Notifications (Laravel Events, Mailtrap)
- Data Extraction & Processing

Tools & Practices

- Git & GitHub (Version Control)
- Command Line Interface (Cmder, Terminal)
- Postman (API Testing & Documentation)
- Clean Code Principles
- Environment Config (.env)
- Design Patterns (MVC)

Education

Bachelor's Degree in Computer Science, Modern Academy

Seb. 2020 – Jun. 2024 | Cairo, Egypt

Languages

Arabic – Native • Bilingual

English – Proficient
